ProServiceIT's Staffing Augmentation Model Offers Clients Savings

ProServiceIT assists organizations in matching scalability to demand through their IT staffing augmentation services.

ProServiceIT clients have access to a broad base of IT skills, solutions, and knowledge to meet today's every evolving IT service requirements. With ProServiceIT's staff augmentation model, their clients are rewarded with substantial savings. Plus, it requires minimal contracting effort, has a simple hourly rate model, and can scale up or down quickly. The cost of using a ProServiceIT assigned service technician for temporary IT requirements and disengaging once those requirements have been met, can more than offset the higher cost of engaging more permanent IT resources.

Many information technology departments are seeking various ways to increase their response times, overcome short-term capability insufficiencies, or accommodate the impact of hiring restrictions by utilizing ProServiceIT. Ensuring companies derive the most value, including flexibility and skill access is one of ProServiceIT's primary goals.

Sales Executive Ed Crawford stated, "The core of ProServiceIT's business model is based on service delivery excellence and we invest heavily in achieving and nurturing that capability. By partnering with us, organizations allow IT leadership to focus on how to utilize technology to add value to their organizations, while feeling secure in the knowledge that effective and efficient service execution is under contract. We share in our clients challenges and deliver quality onsite services to address them."

The client always remains in control of their environment through ProServiceIT's contractual commitments and the fostered relationship between the organizations. ProServiceIT's balanced blend of service delivery options ensures their clients receive the best combination of value and expertise needed to be successful.
